

Sexual Orientation and Gender Identity

An awareness of gender and sexual diversity (GSD) is to understand the complexity of a person's many facets—biological sex, gender identity, gender expression, and sexual orientation—and to recognize human diversity across these dimensions. Discussions about GSD typically account for gender norms, which vary across cultures and time and have a powerful influence on the lives and health of all people. Gender and sexual minorities often face high levels of stigma and discrimination, which directly increases risks to their health and impacts their access to services.

Join us for this one-hour discussion on sexual orientation and gender identity!

TUESDAY, OCTOBER 4TH, 2022

12:00 PM – 01:00 PM EST

**Guest Speaker
Regina Gerbier**
